

## **TRAMWAY SECTION THURSDAY REPORT**

**18<sup>th</sup> December 2008**

The usual small amount of workers turned out for the day at Glenreagh yesterday. Good to see those who did turn up. The tram dept still continues to get a few things done with restoration. Ron Swadling continues to do great work on Tram 392. He has finished the drivers cabs and now is concentrating on the windows. The windows in the rebuilt section of the tram are ok and have been previously restored but the windows in the other section need much more work doing on them. So keep up the great work Ron.

We also had a major clean up inside and around the tram shed area. If suddenly we get approval to move the tram we need to be able to get a scissor lift in on a tidy area. Also other depts. cleaned up and the place is looking a lot better indeed. We also put the big frame on wheels and the work stand inside the tram shed. This also made the area a lot neater looking.

To finish I would like to wish all a Merry Christmas and a happy new year. We all hope the new year brings great things like accreditation and running again. See you all in the new year at Glenreagh.

Russ  
Tram Manager
